Yanis Bendehane

Engineering Student in Computer Science | Networks, Infrastructure and Security

Aix-en-Provence, France | bendehane.yanispro@gmail.com | linkedin.com/in/yanisb9

Summary

Computer science engineering student in an apprenticeship at Thales on mission-critical defense software. Experience in network design, IT operations on an industrial site, authentication and containerized infrastructure. Seeking a 17-week research internship abroad in networks or cybersecurity, mid-June to mid-October 2027.

Education

CESI School of Engineering, MEng in Computer Science – Aix-en-Provence, France — Sept 2023 – Sept 2028

- French Diplôme d'Ingénieur (CTI-accredited, Master's level): integrated preparatory cycle 2023–2025, apprenticeship engineering cycle with Thales 2025–2028
- Engineering cycle: semester 5 fully validated with grade A in every teaching unit; operations research unit graded A

Lycée Jean Monnet, Bac in Mathematics and Physics-Chemistry, with honors (Mention Bien) – Vitrolles, France — Sept 2020 – July 2023

Experience

Apprentice Software Engineer, Thales Services Numériques – Aix-en-Provence, France — Oct 2025 – present

- Develop and test features of a large-scale, mission-critical defense software system in Java on Linux, within a 40-person engineering team spread over three sites
- Apply the reliability and quality standards of critical systems: strict configuration management (Subversion), testing and documentation

IT Intern, LyondellBasell – Berre-l'Étang, France — Apr 2025 – June 2025

- Provided level 1–2 user support: workstation provisioning, Cisco IP phones, Active Directory, IT asset management
- Rebuilt a legacy C++ (MFC) program as a standalone C# Windows service that synchronizes tank logistics states between a real-time industrial database (AspenTech IP.21) and SQL Server over ODBC

Academic Projects

Secure information system design (group project, IS Administration and Security module) — Nov 2025 – Dec 2025

- Mapped and secured a two-site company's information system: VLAN per department, DMZ, site-to-site VPN, Active Directory, Zabbix monitoring, backup plan
- Automated account administration with PowerShell and Group Policy; delivered a working mock-up

Multi-site network design (group project, Networks and Systems module) — Dec 2024 – Jan 2025

- Designed topologies and IPv4/IPv6 addressing plans for four client sites; configured switches, routers and Wi-Fi with VLANs, inter-VLAN routing, EtherChannel and IPv6 tunnels in Cisco Packet Tracer
- Planned the deployment with Gantt and PERT charts

Microservices social network (team of 3, Distributed Applications module) — June 2026

- Owned the authentication service (Node.js, Express, PostgreSQL, Sequelize, JWT with refresh tokens, bcrypt) and the infrastructure layer
- Deployed 7 Docker containers with Docker Compose behind an Nginx API gateway validating JWTs before routing

Leadership and Volunteering

Co-organizer, charity football tournament (CESI civic engineering project) — Jan 2024 – June 2026

- Organized three editions with a team of five; proceeds donated to charities chosen by the winning teams (incl. Les Restos du Cœur, ShareTheMeal)

Skills

Networks: VLANs, inter-VLAN routing, EtherChannel, IPv4/IPv6 addressing, Wi-Fi design, Cisco Packet Tracer, Cisco IP telephony

Security: JWT authentication and refresh tokens, bcrypt, API gateway (Nginx), data pseudonymization, information systems security

Systems: Linux, Windows, Active Directory, Docker, Docker Compose, IT asset management

Programming: Java, C#, Python, JavaScript, SQL

Languages: French (native), English (B2, TOEIC practice test 865/990), Spanish (school level), Arabic (basic)

Certification: ANSSI SecNumacadémie (French national cybersecurity MOOC)
